Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Clinical Lectures on Pulmonary Phthisis: Translated, by Permission of the Author, From the Second German Edition The dogma of Laennec, that every phthisis of the lungs is owing to a new or morbid formation, une espece particuliere de production and that the existence of cavities in the lungs depends entirely on the softening and casting out of this morbid material, was an hypothesis which has been overthrown by the later investigations in patho logical anatomy. And therewith the consequences which Laennec had deduced from that hypothesis must lose their force; and the continued assertions, that a catarrh from which a phthisis is developed must be considered not as a primary genuine catarrh, but as secondary, depending on the irritation of the lungs caused by the presence of tubercles, and that the same is true of pneumonias and pneumorrhagias which so frequently precede phthisis, prove that, in this field, practical medicine has almost entirely ignored the advances made by pathological anatomy.
