Accurate fatigue measurement is in its infancy as applied to the industries. Such measurement can take place only where there is complete cooperation between the man measured and the man making the measurements. With the cooperation, that is the natural result of measured functional management, comes the possibility of making accurate measurements of fatigue under either laboratory or shop conditions. It is as easy to pretend to be tired as to pretend to be working. There is little or no profit in measuring pretended states. Under the scientific form of management there is no incentive to pretend anything. The incentive is, rather, to show exactly what one is doing and how one feels, in order that accurate records may be made, and that the offered...
