NEGATIVE CO-RECEPTORS AND LIGANDS

Springer-Verlag Gmbh Apr 2011, 2011. Buch. Condition: Neu. Neuware - Adaptive immune responses serve as a key defense mechanism for the control of infections in vertebrates. Immune responses must be of sufficient strength to contain invading pathogens, antigen specific responses require regulatory mechanisms to ensure termination or downmodulation to avoid excessive damage to the host tissue. For both branches of the adaptive immune system, regulatory molecules i.e. coreceptors and ligands have been identified that control the signaling cascades initiated by...
